Iftikhar Ahammad Sikder

Flutter Developer

I am **Iftikhar Ahammad Sikder**, currently working as a Flutter App Developer at **6amTech**. As a dedicated Flutter developer, I specialize in developing high-performance, cross-platform mobile applications and am passionate about crafting clean UI/UX designs and scalable app architectures to deliver seamless user experiences. I am eager to join as a Flutter developer, where I can leverage my skills and contribute to the development of innovative and impactful projects.

Work Experience

6amTech *2025 Aug – Present*
Jr. Software Engineer Mirpur DOHS, Dhaka

- Develop and maintain cross-platform mobile apps using Flutter, ensuring smooth performance and scalable architecture across Android, iOS, and Web.
- Implementing new features and modifying existing features across all 6amTech products to enhance high performance & scalability.
- Collaborate closely with the **Backend team** and **UI/UX designers** to deliver features aligned with product goals, ensuring seamless integration of APIs, design elements, and business logic.
- Perform end-to-end installation & configuration for multiple applications, like User, Vendor, Deliveryman, Admin & Flutter Web
- Deliver any UI customizations like layout, theming, fonts, favicons, onboarding graphics, or visual branding aligned with client needs.
- Modify custom features, adapting product functionalities to match diverse business requirements across different client products.
- Assist clients in understanding the business logic and operational processes to ensure smooth adoption of the applications.
- Configure third-party integrations, including Facebook and Google authentication, Firebase OTP verification, push notifications etc.
- Manage full app publishing workflows, preparing builds, resolving store-side issues, &releasing app to both **Play Store & App store**.

Startsmartz Technologies *2025 Jan – 2025 July*
Jr. Flutter Developer Norda, Dhaka

- Built cross-platform mobile apps using Flutter for Android & iOS. Eg. E-commerce (***SHODEI***), EMI Management, Event Planner etc.
- Designed clean UI with custom layouts and responsive design.
- Used state management tools like GetX, Bloc, RIverpod Integrated REST APIs and managed JSON data.
- Worked with Firebase services including auth, cloud database.
- Optimized app performance, debugged and tested applications across multiple devices to ensure consistent and bug-free user experience.

Square Health *2024 Nov – 2025 Jan*
Flutter Developer Intern Mohakhali, Dhaka

- Developed several projects, notably a Prescription PDF Builder application using Flutter with Riverpod for state management, and integrated multiple packages for PDF generation.
- Implemented document processing features using various Flutter packages for PDF creation, formatting, sharing and file handling.
- Collaborated with healthcare domain experts to understand prescription requirements.
- Built user-friendly interface for healthcare professionals to create and manage prescription documents digitally.

Projects

- **6Valley – [6amTech]** ↗

6Valley is a multi-vendor, multi-purpose platform built with Laravel and Flutter, offering food delivery, grocery, and other on-demand services in a unified system. It provides streamlined order flow, multi-language support, advanced dispatching, and scalable multi-store management. My contributions include delivering client-specific UI customizations, integrating new features, configuring third-party services like social login and Firebase OTP, and handling complete Play Store publishing for multiple customized client apps. **Moreover, I have successfully published more than 30 applications on the Google Play Store.**
App Link: *Play Store*↗ **App Link:** *App Store*↗

- **DriveMond – [6amTech]** ↗

DriveMond is a cross-platform ride-sharing and parcel-delivery solution built with Laravel and Flutter, offering seamless ride management and scalable operations. My contributions include delivering client-specific UI customizations, integrating new features, configuring third-party services such as social login and Firebase OTP, and managing complete Play Store publishing for multiple customized client apps.
App Link: *Play Store*→

- **Confidence Reseller**

Frontend + API Integrator
E-commerce reseller app built with Flutter and Riverpod, supporting product browsing, reseller dashboards, earnings tracking, and secure OAuth2 authentication. I handled REST API integration, UI design, and local data caching using SharedPreferences for offline support.
App Link: *Play Store*→

- **SHODEI – [Startsmartz Technologies]**

Frontend + API Integrator
Multi-vendor shopping app built with Flutter and Provider, featuring product filtering, cart, wishlist, and order tracking. I developed core modules such as add-to-cart for both login and guest modes using the Hive local database, checkout functionality, coupon and announcement features, account deletion, optimized UI responsiveness, and integrated Firebase for Google login.
App Link: *Play Store* →

- **COMP Sport App**

Frontend + API Integrator
Community sports app developed with Flutter and Riverpod, featuring team registrations, live match updates, and event announcements, using Firebase and Realtime Database. My contributions include converting Figma designs to Flutter screens, implementing OTP and Google login, and ensuring smooth integration across all core features.
App Link: Private Deployment

- **EMI's Management - [**Startsmartz Technologies]

Full Stack

EMI tracking app built with Flutter and Provider, featuring scheduling, local notifications, and payment enforcement logic. I developed the entire app including financial summaries, custom reminders, and a phone lock mechanism that restricts device access if EMI is overdue beyond a defined grace period.

App Link: Internal/Private Deployment

Key Achievements

- Successfully delivered 10+ mobile applications across various industries.
- Reduced app development time by 30% through reusable widget architecture.
- Ensured seamless user experience across all deployed applications through continuous refinement.

Full-Stack Projects (Undergrad)

◈ **E-Medical Solution System**

A web-based healthcare management system for patient records, appointments, and prescriptions, built using HTML, CSS, JS, PHP, and MySQL.

◈ **Fashion & Focus BD**

An e-commerce website for a clothing brand, featuring product listings, cart system, and order management using HTML, CSS, JS, PHP, and MySQL.

Preview: https://www.youtube.com/@eftyshikder2415

Academic Achievement

◈ **BDApps National Hackathon 2022 – Gala Round (4th Position)** View

Secured 4th place nationally in the BDApps Hackathon Gala Round by developing an innovative mobile solution under pressure with real-time mentorship and competitive evaluation.

◈ **Project Showcase – Plastic Bank (Winner)**

Won first place for presenting an impactful tech solution addressing plastic waste management through incentivized recycling and community engagement strategies.

Research Work

◈ Developed a machine learning model to predict Parkinson's Disease using patient voice and biometric data, featuring data preprocessing, training, and evaluation. View

◈ Built a web-based ML application for cervical cancer prediction using patient health data, integrating model deployment with an interactive user interface. View

Competitive Programming

◈ Beecrowd: 50+ (C, C++, Python) **View**

◈ CodeChef: 40+ (C, C++, Python) **View**

◈ CodeForces: 8 (C, C++, Python) **View**
